DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Canada on November 18, 2002. It is noted, however, that applicant has not filed a certified copy of the Canadian application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 5 and 7-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In line 2 of claim 5, it is unclear if the referred to "keyed surfaces" are intended to be the same feature as the "keyed surfaces" set forth in claim 3, from which claim 5 depends. Line 1 of each of dependent claims 7-18 sets forth "An armrest support as claimed ..." Such is indefinite since the lone independent claim is directed to "An adjustable in height armrest". Is the armrest support intended to be the same feature as the armrest? Consistency in terminology is required throughout the claims. In claim 15, "said spring biased lock release mechanism" lacks proper antecedent basis. In claim 16, "said recesses of said armrest carrier" lack proper antecedent basis.

Allowable Subject Matter

4. Claims 5 and 7-18 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
5. Claims 1-4 and 6 are allowed.

Conclusion

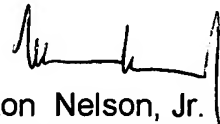

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. An armrest assembly that is adjustable along a vertical axis and/or about a vertical axis is shown by each of Davis et al (6702386), McAllister et al (6394553), Schuelke et al (5599067), Hansen (6502904), Kopish et al (6460932), Congleton et al (6296312), Phillips et al (2002/0190561), Roslund, Jr. et al (6619746), Lee (6139107), and Chen (6209961).
